

🔥 Rugpull Roulette v2

Solana Wallet Roast + Exit Liquidity Detector

A Cloudflare-native Web3 tool that roasts wallets and classifies traders. Built for degens.

Features

🔥 Roast Mode

- Scans wallet balances, transactions, NFTs
- Generates savage, shareable roasts
- Degen score (0-10)
- One-click X/Twitter share

🇺🇸 Classify Mode (Exit Liquidity Detector)

- Analyzes trade patterns & win rates
- Classifies wallets:
 - 🟡 **BOT / SNIPER** — Too fast to be human
 - 🔴 **EXIT LIQUIDITY** — Professional bag holder
 - 🟠 **PAPER HANDS** — Panic seller
 - 🟢 **AVERAGE DEGEN** — Normal crypto degenerate
 - 🔵 **SMART MONEY** — Actually profitable
 - 🦑 **WHALE / LEGEND** — Time traveler or insider
- **Countertrade recommendation** — “Do the opposite of this wallet”
- Classification factors with visual breakdown

🏆 Leaderboard

- Ranks all classified wallets
- Toggle: Worst Degens vs Smart Money
- Persistent via Cloudflare KV

Architecture

```
Cloudflare Worker (src/index.js)
├── /api/roast      → Roast engine
├── /api/classify   → Exit Liquidity Detector
├── /api/countertrade → Countertrade generator
├── /api/leaderboard → KV-backed rankings
└── /api/health     → Health check

Cloudflare Pages (static/index.html)
├── Roast Mode UI
├── Classify Mode UI
└── Leaderboard UI
```

Deploy

1. Clone & Setup

```
git clone <your-repo>
cd rugpull-roulette
npm install
```

2. Login to Cloudflare

```
npx wrangler login
```

3. Set Secrets

```
# Helius API Key
npx wrangler secret put HELIUS_API_KEY

# For leaderboard (optional)
npx wrangler kv:namespace create "LEADERBOARD_KV"
# Copy the ID from output, paste into wrangler.toml
```

4. Deploy

```
# Deploy Worker
npx wrangler deploy

# Deploy Frontend (Pages)
npx wrangler pages deploy static --project-name=rugpull-roulette
```

5. GitHub Actions Auto-Deploy (Optional)

1. Go to GitHub repo → Settings → Secrets
2. Add CLOUDFLARE_API_TOKEN (get from Cloudflare dashboard → My Profile → API Tokens)
3. Add HELIUS_API_KEY
4. Push to main — auto-deploys!

API Endpoints

Endpoint	Description
GET /api/roast?address=	Get roast data
GET /api/classify?address=	Get classification + countertrade
GET /api/countertrade?address=	Get countertrade only
GET /api/leaderboard?sort=worst best&limit=20	Get rankings
GET /api/health	Health check

Roast Examples

“You have 0.0263 SOL. That’s not a wallet, that’s a receipt.”

“Holding 6 memecoins. Your portfolio is a circus and you’re the clown.”

“Bought the top 4 times. You’re not an investor — you’re exit liquidity with a seed phrase.”

Disclaimer

Not financial advice. This is satire. Don’t actually countertrade strangers. Or do. We’re not your dad.
